Preface

Washington Public Library Statistics - 1991

For this edition, the tables in *Washington Public Library Statistics* have been revised, although the same basic information has been included. An additional population range of over 250,000 has been created, and the 5,000 and under range has been separated into those libraries with and without a librarian holding Washington state certification.

The tables which include financial information begin with a broad view of revenue and expenditures and then zoom in on the breakouts of that data. The financial data provided is not audited and includes estimates. Certain expenditure classifications do not conform with GAAP (Generally Accepted Accounting Principles) and inconsistent accounting policies relating to the treatment of new library book purchases were used by the various libraries. Nevertheless, while accounting policies may classify book purchases differently, an effort has been made to show collections expenditures consistently.

In addition, 1992 marks the sixth year that Washington's data has been submitted for compilation of data on public libraries in the United States. In 1992, the National Center for Education Statistics (NCES) was able to publish the data for 8,978 public libraries in the fifty states and the District of Columbia, representing the first presentation of accurate statistical data from public libraries throughout the United States. The publication, *Public Libraries: 1990, E.D. TAB NCES 92-028*, will be distributed by NCES to all public libraries that contributed data.

This is also the first year that the public library statistics have included the participation of a statistics planning team at Library Planning and Development. Team members included: Jan Walsh, team leader; Jeanne Crisp; Wolf Fletter; Shirley Lewis; and Jan Solt.

The information included in this publication is also available in Lotus 1-2-3 format on floppy disk; please send a formatted 3.5 or 5.25 inch diskette to Jan Solt, Library Planning and Development, Washington State Library, PO Box 42472, Olympia, WA 98504-2472.

If you have questions or comments about the data or this publication, please contact Jan Walsh at Library Planning and Development, (206) 753-2114, SCAN 234-2114, 1-800-562-6090.

Looking at Washington Through a Wide-Angled Lens

Because of Washington's participation in the Federal-State Cooperative System for Public Library Data, we are able to compare Washington's data with that of the 49 other states and the District of Columbia. Facts and figures represented in this section are included in *Public Libraries in 50 States and the District of Columbia: 1990, and E.D. TAB (NCES 92-028: Data Series DR-LIB-89/90-1.1)* published in 1992 by the National Center for Education Statistics (NCES) with the cooperation of the U.S National Commission on Libraries and Information Science (NCLIS) and 50 state library agencies including the Washington State Library. The data provided by Washington's public libraries on *Washington Libraries: Annual Report Form* is used to compile the information which is transmitted to the National Center for Education Statistics and included in the publication.

A comparison of Washington's public libraries with those of other states and the District of Columbia provides a snapshot of Washington public libraries at this time. The following charts utilize the 1990 data.

Washington ranks second in the nation, behind Hawaii, in capital outlay per 1,000 population, spending almost $4,000 more than the national average per 1,000 population.

Capital Outlay Per Capita 1990

Furthermore, Washington's rank dropped from sixth to eighth in operating expenditures per capita at $21.52 (from $19.81 in 1989) and remained ninth in staff expenditures per capita.

Expenditures Per Capita
1990

	Staff Expenditures	Total Expenditures
Washington	$14.25	$21.52
National Average	$9.47	$16.28

The percentage of total expenditure increased to slightly more than the national average in the staff and collection categories and decreased to slightly lower than the average on other expenditures.

In percentage of total revenue by category of source, Washington's public library revenue derived from state sources varied significantly from 1989; Washington's rank of 27th in percentage of revenue from local sources changed to 19th; the rank of 44th in percentage of revenue from federal sources changed to a tie for 36th; the rank of 39 became a tie for 41st in percentage from state revenue; and the percentage of operating revenue from "other" sources changed from second to 14th. Other operating revenue "includes all income other than reported as local government income, state government incomes, and federal government income. It includes, for example, gifts, donations, interest, fines, and fees. It does not include the value of any contributed services or the value of in-kind gifts and donations." Paid FTE's Per 10,000 Population 1990

The statistics on staff show that Washington is now ranked 12th (from 13th) in paid full-time equivalents (FTEs) per 1,000 population, and is above average in libraries with .01 to .99 FTE, 25 - 100 FTEs, and above 100 FTEs.

In terms of collection, Washington's public libraries rank now rank 22nd (from 27th) in volumes held per capita; in 1989, Washington was below the national average in volumes held per 1,000 population, but now ranks above the national average. However, the state ranks seventh in audio per capita, and second in video per capita. In films and serials per capita, Washington ranks 17th and 18th, respectively.

In terms of number of holdings per 1,000 population, Washington public libraries hold more than the average number in serials, audio, and videos and less than the average in films and serials. Last year the state held more than the national average in serials per capita.

The data also records a picture of the service provided by the state's libraries. The state of Washington ranked third in circulation per capita at 9.46 items, an increase from 9.08 items per capita. It is well above the national average of 5.75 items, which also increased from 5.60 items in the previous year.

In addition, the state ranked 10th (up from 11th) in attendance in library per capita, which is above average, and it leaped to 6th (from 16th) in reference transactions per capita, now above the average.

Furthermore, the state was above average in the percent of libraries open less than ten hours a week and those open thirty to forty-nine hours a week, while falling below average in the percent of libraries open ten to twenty-nine and more than sixty hours a week.

Washington's ranking in materials loaned and borrowed via interlibrary loan has dropped to 24th in both areas (from 19th and 20th respectively), although the number loaned per 1,000 population has increased slightly while the number borrowed has decreased. The actual number loaned and borrowed per 1,000 population is below the national average.

Finally, the data shows that in Washington the percentage of the state's population served by libraries of less than 5,000 population in the legal service area, those serving between 5,00 and 24,999, and those serving between 25,000 and 99,999 is now less than the national average. As it was last year, 54.9% of the population of Washington which has library service is served by the five libraries which serve over 250,000 population.

[1] Population figures based on Office of Financial Management document: *1991 Population Trends for Washington State*, August, 1991.

[2] Percent of change compares figures for 1991 with those for 1990 for net increase, (net decrease).

[3] In this column, subtotals are the calculation for the population range and grand total is the calculation for the state when provided.

* No rational comparisons can be made. When this occurs, no calculations are made in the subtotal or total columns.

[2] In this column, subtotals are the calculation for the population range and grand total is the calculation for the state when provided.

[3] Libraries with a rate over 1.00 are net lenders; those with a rate less than 1.00 are net borrowers.

[4] Includes 436,149 circulation count for Washington Library for the Blind and Physically Handicapped.

[5] When NR is reported in a column involved in a calculation, the population for that library is subtracted before the per capita calculation is made.

GLOSSARY

ADULT-CIRCULATION: (Table 10) This is the annual circulation of all adult materials in all formats to all users. It is a count of the adult materials that are circulated, no matter who borrows them. ***See also Circulation, Children-, Young Adult-Circulation.***

ADULT-LIBRARY PROGRAMS: (Table 11) This is the number of programs for which the primary intended audience is adults (those over 18). A program or presentation is an information contact in which a staff member or person invited by a staff member provides information intended for a number of persons and planned in advance. Information service to groups may be either bibliographic instruction or library use presentations, or it may be cultural, recreational, or educational programs or presentations. Programs or presentations both on and off the library premises are included, as long as they are sponsored by the library. This does not include meetings sponsored by other groups using library meeting rooms. ***See also Library Programs, Children-, Young Adult-Library Programs.***

ADULT-PROGRAM ATTENDANCE: (Table 11) The number of people of all ages attending programs or presentations intended for adults which are planned and sponsored by the library. ***See also Program Attendance, Children-, Young Adult-Program Attendance.***

AMOUNT PER CAPITA: ***See Per Capita.***

ANNUAL LIBRARY ATTENDANCE: (Table 12) This is the total number of persons entering the library annually including persons attending activities and meetings, as well as those persons requiring no staff services.

ANNUAL LIBRARY ATTENDANCE PER CAPITA: (Table 12) Library attendance per capita relates the total number of persons entering the library annually to the population of the library's legal service area. It is the annual attendance at the library divided by the population of the library's legal service area. This measure indicates the average number of library visits per person served.

ANNUAL PUBLIC SERVICE HOURS: (Table 8, 12) This is the total annual public service hours for all outlets combined. Both main library and branches are counted using the following instructions: "Report the sum of annual public services hours for service outlets. Include central, branches, and bookmobiles. Do not include other service outlets. For bookmobiles report only the hours during which the bookmobile is open to the public. Do not include hours for deposit collections or other similar service outlets."

ANNUAL REFERENCE TRANSACTIONS: (Table 12) This is the total number of reference transactions in the year. A reference transaction is an information contact which involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. The term includes information and referral service. Information sources include print and non-print materials, machine-readable databases (including computer-assisted instruction), catalogs and other holdings records and, through communication or referral, other libraries and institutions, and persons both inside and outside the library. When a staff member utilizes information gained from previous use of information sources to answer a question, report it as a reference transaction, even if the source is not consulted again during this transaction.

ANNUAL REFERENCE TRANSACTIONS PER CAPITA: (Table 12) This measure relates the number of information contacts which involve the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a staff member to the population of the library's legal service area. It is the annual number of reference transactions divided by the population of the library's legal service area. This measure indicates the average number of times a resident of the library's legal service area received staff assistance in using information sources available at or accessible through the library.

ASSESSED VALUATION: (Table 4) This is the assessed value of property within the legal service area's geographic boundaries. This figure is obtained from the Washington State Department of Revenue and State Auditor.

Included are those parts of any employee benefits paid by the public library.

Serials include periodicals (magazines), newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies. Except for the current volume, unbound serials are counted as volumes when the library has at least half of the issues in a publisher's volume. The number of physical units held at the end of the year are reported. Physical units are volumes, items or pieces. Six copies of the same edition of a title count as six volumes.
